

```

import java.util.Scanner;
public class FstTrain {
public static void main(String[]args) {
Scanner scanner = new Scanner (System.in);
int n=scanner.nextInt();
int j=0;
do {
System.out.println(j);
j+=2;
}
while(j<=n);

```

```

n=scanner.nextInt();
j=1;
int t=0;
do {
t+=j*j;
j++;
}
while(j<=n);
System.out.println(t);

```

```

n=1;
do {
j=1;
do {
System.out.printf("%3d",j);
j++;
}
while(j<=n);
System.out.println();
n++;
}
while(n<=5);
scanner.close();
}
}

```
